

I'm writing in support of K-LOVE radio. It's made a huge difference in my life. I listen to it every chance I get, especially in the car. I work at a Nuclear waste clean-up facility. It's a very high stress job. To & from work I turn on K-LOVE & feel my stress go away from the positive, uplifting music & prayer. No more getting mad at other drivers or being a grouch when I get home to my family. I also work with troubled youth & see the positive effects of K-LOVE in their lives. So many youth & society in general feel hopeless & alone in our world today & K-LOVE gives them hope, comfort & encouragement. Doing anything that would force this station off the air would not only be a grave disservice to society, but would, without a doubt, be damaging to our community & take away one of the most positive forms of communication there is today. Please protect K-LOVE!!!!!!
